# Subject Index

**0100 Costs**

**0101 Budgeting**

*Stochastic Dominance Relations in a Project Cost Problem;* Mehrez, A., Regev, U.; June; p. 194.

*A Minimum Cost Approach for Finding Fractional Factorials;* Pignatiello, J. J., Jr.; September, p. 212.

*Preference Trade-Offs in Capital Budgeting Decisions;* Deckro, R. F., Spahr, R. W., Herbert, J. E.; December; p. 332.

**0102 Cost controls**

*A Future Value Approach to Determining Project Duration;* Rosenblatt, M. J., Roll, Y.; June; p. 164.

**0103 Cost estimating**

*A Minimum Cost Approach for Finding Fractional Factorials;* Pignatiello, J. J., Jr.; September; p. 212.

*Cost Estimating Methods for Evaluating the Conversion from a Functional Manufacturing Layout to Group Technology;* Boucher, T. O., Muckstadt, J. A.; September, p. 268.

*An Insightful Marginal Cost Analysis for an Electric Utility Capacity Planning Problem;* Sherali, H. D.; December; p. 378.

**0104 Cost reduction programs**

*Cost Estimating Methods for Evaluating the Conversion from a Functional Manufacturing Layout to Group Technology;* Boucher, T. O., Muckstadt, J. A.; September; p. 268.

**0105 Productivity**

*Unitary Manufacturing Cell Design with Random Product Feedback Flow;* Seidmann, A., Nof, S. Y.; June; p. 188.

**0300 Engineering economics**

**0301 Cash flow analysis**

*Applications of the Discounted Depreciation Function;* Baum, S.; September; p. 299.

**0303 Investment analysis**

*The Effectiveness of the Expected Value-Variance-Skewness Criterion in the Multi-Stage Capital Rationing Problem;* Park, C. S., Wu Yeh, M. M.; March; p. 67.

*The Acquisition of Automation Subject to Diminishing Returns;* Gaimon, C.; June; p. 147.

*Optimal Conversion to a New Production Technique Under Learning;* Vickson, R. G.; June; p. 175.

**0304 General**

*Factors That Affect the Growth Rate of Equity Capital;* Oakford, R. V., Salazar, A., Digiulio, H. A.; June, p. 123.

*A Difference Method Applied to Engineering Economy;* Mahoney, J. F.; June; p. 182.

**0400 Facility planning and design**

*Airline Terminal Design Using Computer Simulation;* Cook, T. M., Rao, Prakash; December; p. 314.

*Sizing Storage Facilities for Open Pit Coal Mines;* Bradley, C. E., Taylor, S. G., Gray, W. I.; December; p. 320.

**0402 Facility location**

*The Facility Location Problem for Hyper-Rectilinear Distances;* Juel, H., Love, R.; March; p. 94.

*Dimensional Analysis in an Industrial Engineering Setting;* Mahoney, J. F., Ventura, J. A.; June; p. 198.

*A Dual-based Heuristic for the Simple Facility Location Problem with Stochastic Demand; Tcha, D., Yoon, M.; December; p. 364.*

**0500 Functional operations**

**0504 Maintenance, plant engineering**

*A Note on "Determination of Coordinated Maintenance Scheduling Frequencies for a Group of Machines";* Goyal, S. K., Büyükkurt, M. D.; December; p. 400.

**0600 Human Engineering**

**0603 Ergonomics**

*A Computer-Aided Panel Layout Procedure for Process Control Jobs -- LAYGEN;* Pulat, B. M., Ayoub, M. A.; March, p. 84.

**0604 Learning**

*The Effects of Learning on Optimal Lot Sizes: Further Developments on the Single Product Case;* Smunt, T. L., Morton, T. E.; March; p. 33.

*Optimal Conversion to a New Production Technique Under Learning;* Vickson, R. G.; June; p. 175.

**0606 Personnel scheduling**

*Work-Force Scheduling with Cyclic Requirements and Constraints on Days Off, Weekends Off, and Work Stretch;* Emmons, H.; March; p. 8.

**0800 Industrial engineering**

**0805 IE's, IE technologies**

*Decision Support Systems: A Perspective for Industrial Engineers;* Nestman, C. H., Windsor, J. C.; March; p. 38.

**0808 General**

*Energy Planning for Puerto Rico: A Systems Modeling Approach;* Haddock, J., Sparrow, F. T.; March; p. 75.

**0900 Industries**

**0904 Manufacturing**

*Simultaneous Lot Sizing and Sequencing for Multistage Production Systems;* Afentakis, P.; December; p. 327.

*Cyclic Assembly Schedules;* McClain, J. O., Trigeiro, W. W.; December; p. 346.

*An Analysis of Scheduling Policies on Multiechelon Production Systems;* Yano, C. A., Carlson, R. C.; December; p. 370.

*A Note on "Determination of Coordinated Maintenance Scheduling Frequencies for a Group of Machines";* Goyal, S. K., Büyükkurt, M. D.; December; p. 400.

**1000 Management**

**1007 Project management**

*Multi-Project Scheduling: Analysis of Project Performance;* Kurtulus, I. S., Narula, S. C.; March; p. 58.

*A Future Value Approach to Determining Project Duration;* Rosenblatt, M. J., Roll, Y.; June; p. 164.

**1100 Material handling**

**1105 Dispatching, scheduling**

*Lotsizing in Multi-Item Multi-Machine Job Shops;* Karmarkar, U.S., Kekre, Sham, Kekre, Sunder; September; p. 290.

**1200 Methods engineering**

**1201 Automation, mechanization**

*Unitary Manufacturing Cell Design with Random Product Feedback Flow;* Seidmann, A., Nof, S. Y.; June; p. 188.

*Cost Estimating Methods for Evaluating the Conversion from a Functional Manufacturing Layout to Group Technology;* Boucher, T. O., Muckstadt, J. A.; September; p. 268.

**1300 Quantitative methods**

*Dimensional Analysis in an Industrial Engineering Setting;* Mahoney, J. F., Ventura, J. A.; June; p. 198.

*Optimal Design of Standby Redundant Components for a System Which Has a Mission of Random Duration;* Wells, C. E., Bryant, J. L.; December; p. 302.

*Optimal Preventive Maintenance Policies for Systems With Missions of Random Duration;* Wells, C. E., Bryant, J. L.; December; p. 338.

**1301 Mathematical Models**

*An Optimal Policy for the Dynamic Transportation Inventory Model with Deterioriating Items;* Hwang, H., Sohn, K.; September; p. 233.

*Sizing Storage Facilities for Open Pit Coal Mines;* Bradley, C. E., Taylor, S. G., Gray, W. I.; December; p. 320.

*Preference Trade-Offs in Capital Budgeting Decisions;* Deckro, R. F., Spahr, R. W., Herbert, J. E.; December; p. 332.

*The Replication of Multi-year Solutions Using Single Period Models of Electric Utility Capacity Expansion Planning;* Murphy, F. H., Saraf, S., Soyster, A. L.; December; p. 396.

*Preference Trade-Offs in Capital Budgeting Decisions;* Deckro, R. F., Spahr, R. W., Herbert, J. E.; December; p. 332.

*The Replication of Multi-year Solutions Using Single Period Models of Electric Utility Capacity Expansion Planning;* Murphy, F. H., Saraf, S., Soyster, A. L.; December; p. 396.

**1302 Networks**
*Lagrangean Relaxation for the Multi-item Capacitated Lot-Sizing Problem: A Heuristic Implementation;* Thizy, J. M., Van Wassenhove, L. N.; December; p. 308.
**1303 Programming: linear, nonlinear**
*The Effects of Learning or Optimal Lot Sizes: Further Developments on the Single Product Case;* Smunt, T. L., Morton, T. E.; March; p. 33.
*Capacitated Multiple Item Ordering Problem with Quantity Discounts;* Pirkul, H., Aras, O. A.; September; p. 206.
*A Dual-based Heuristic for the Simple Facility Location Problem with Stochastic Demand;* Tcha, D., Yoon, M.; December; p. 364.
**1305 Simulation/games**
*Solving Multiple Response Simulation Models in Using Modified Response Surface Methodology Within a Lexicographic Goal Programming Framework;* Rees, L. P., Clayton, E. R., Taylor, B. W., III; March; p. 47.
*An Application of Computer Simulation to Quality Control in Manufacturing;* Flowers, A. D., Cole, J. R.; September; p. 277.
*Airline Terminal Design Using Computer Simulation;* Cook, T. M., Rao, Prakash; December; p. 314.
*Sizing Storage Facilities for Open Pit Coal Mines;* Bradley, C. E., Taylor, S. G., Gray, W. I.; December; p. 320.
*Weighting Simulation Data to Reduce Initialization Effects;* Snell, M., Schruben, L.; December; p. 354.
**1306 Applied probability**
*On the Phase-Type Approximations of General Distributions;* Altiok, T.; June; p. 110.
*Bayesian Availability Using Gamma Distributed Priors;* Kuo, W.; June; p. 132.
*Unitary Manufacturing Cell Design with Random Product Feedback Flow;* Seidmann, A., Nof, S. Y.; June; p. 188.
*Stochastic Dominance Relations in a Project Cost Problem;* Mehrez, A., Regev, U.; June; p. 194.
*An Adpative Estimation Procedure Using the LaPlace Transformation;* Wells, C. E., Bryant, J. L.,; September; p. 242.
**1307 Experimental design**
*A Grouping Algorithm for Qualitative Data with a Dichotomous Outcome Variable;* Raz, T., Goldman, J.; June; p. 168.
**1400 Production and inventory control**
**1401 Distribution systems**
*The Joint Replenishment Problem with a Powers-of-Two Restriction;* Jackson, P., Maxwell, W., Muckstadt, J.; March; p. 25.
**1402 Forecasting**
*The Replication of Multi-year Solutions Using Single Period Models of Electric Utility Capacity Expansion Planning;* Murphy, F. H., Saraf, S., Soyster, A. L.; December; p. 396.
**1403 Inventory control**
*The Joint Replenishment Problem with a Powers-of-Two Restriction;* Jackson, P., Maxwell, W., Muckstadt, J.; March; p. 25.
*The Effects of Learning on Optimal Lot Sizes: Further Developments on the Single Product Case;* Smunt, T. L., Morton, T. E.; March, p. 33.
*On Improving Silver's Algorithm for the Joint Replenishment Problem;* Goyal, S. K.; March; p. 99.
*Implied Backorder Costs;* Fogarty, D. W., Aucamp, D. C.; March; p. 102.
*Capacitated Multiple Item Ordering Problem with Quantity Discounts;* Pirkul, H., Aras, O. A.; September; p. 206.
*An Optimal Policy for the Dynamic Transportation Inventory Model with Deteriorating Items;* Hwang, H., Sohn, K.; September; p. 233.
*Allocating a Replenishment Order Among a Family of Items;* Miltenburg, G. J.; September; p. 261.
*Optimal Inspection and Ordering Policies for Products with Imperfect Quality;* Lee, H. L., Rosenblatt, M. J.; September; p. 284.
*Simultaneous Lot Sizing and Sequencing for Multistage Production Systems;* Afentakis, P.; December; p. 327.
*An Analysis of Scheduling Policies in Multiechelon Production Systems;* Yano, C. A., Carlson, R. C.; December; p. 370.
**1404 Materials management**
*Lotsizing in Multi-Item Multi-Machine Job Shops;* Karmarkar, U. S., Kekre, Sham, Kekre, Sunder; September; p. 290.
*An Analysis of Scheduling Policies in Multiechelong Production Systems;* Yano, C. A., Carlson, R. C.; December; p. 370.
**1406 Production planning**
*On Equivalent Transportation Models for Production Planning Problems;* Evans, J. R.; March; p. 105.
*Designing a Production Line to Maximize Profit;* Rosenblatt, M. J., Carlson, R. C.; June; p. 117.
*Multiproduct Optimal Batch Sizes with In-Process Inventories and Multi Work Centers;* Bertrand, J. W. M.; June; p. 157.
*A Note on "Determination of Coordinated Maintenance Scheduling Frequencies for a Group of Machines";* Goyal, S. K., Büyükkurt, M. D.; December; p. 400.
**1407 Production scheduling**
*Flexible Mixed-Integer Programming Formulations for Production Scheduling Problems;* Bruvold, N. T., Evans, J. R.; March; p. 2.
*A Multifactor Priority Rule for Jobshop Scheduling Using Computer Search;* Bunnag, P., Smith, S. B.; June; p. 141.
*An Evaluation of Scheduling Policies in a Dual Resource Constrained Assembly Shop;* Russell, R. S., Taylor, B. W., III.; September; p. 219.
*A Forward-Backward Procedure for the Single Machine Problem to Minimize Maximum Lateness;* Larson, R. E., Dessouky, M. I., DeVor, R. E.; September, p. 252.
*Lagrangean Relaxation for the Multi-item Capacitated Lot-Sizing Problem: A Heuristic Implementation;* Thizy, J. M., Van Wassenhove, L. N.; December; p. 308.
*Simultaneous Lot Sizing and Sequencing for Multistage Production Systems;* Afentakis, P.; December; p. 327.
*Cyclic Assembly Schedules;* McClain, J. O., Trigeiro, W. W.; December; p. 346.
*An Analysis of Scheduling Policies in Multiechelon Production Systems;* Yano, C. A., Carlson, R. C.; December; p. 370.
*Improving Profitability with Quantity Discounts under Fixed Demand;* Rosenblatt, M. J., Lee, H. L.; December; p. 388.
**1500 Quality control**
**1501 Inspection**
*Optimal Inspection and Ordering Policies for Products with Imperfect Quality;* Lee, H. L., Rosenblatt, M. J.; September; p. 284.
**1502 Quality Control**
*An Application of Computer Simulation to Quality Control in Manufacturing;* Flowers, A. D., Cole, J. R.; September; p. 277.
**1503 Reliability**
*Optimal Design of Standby Redundant Components for a System Which Has a Mission of Random Duration;* Wells, C. E., Bryant, J. L.; December; p. 302.
*Optimal Preventive Maintenance Policies for Systems with Missions of Random Duration;* Wells, C. E., Bryant, J. L.; December; p. 338.
**1504 Sampling**
*An Application of Computer Simulation to Quality Control in Manufacturing;* Flowers, A. D., Cole, J. R.; September; p. 277.
**1600 Work measurement**
**1608 Standard development**
*An Improved Method for Setting Time Standards for Maintenance Work;* Knott, K., Pena, M. F.; March; p. 17.
